

## NH Children's Behavioral Health Collaborative

The Collaborative is unique in that it is the largest ever coalition of individuals and organizations—hundreds of individuals and over 70 organizations—working in partnership to strengthen communities' response to behavioral health challenges, and to ensure no one's potential is limited by behavioral health challenges in ways that are preventable.

The CBHC has produced the state's first strategic plan to build an integrated and comprehensive service delivery structure to address “behavioral health” - mental health and substance use problems - that is family-driven, youth-guided, community-based and culturally and linguistically competent.

In short, we are working to transform NH's system of behavioral health care because we know that protecting and promoting children's health is a fundamental investment not only in our children's future, but our state's future.
